Date of birth: September, 7th 1977

Citizenship: Spanish

Profile

Sought Objectives

I am seeking a position, possibly with an international perspective focused on architecture, product development that lets me grow together with the product.

I also seek to expand my skills beyond the pure technical aspect including team management, mentoring and learn more about product ownership

Technical Profile

I consider myself as an up-to-date software engineer, aware of the emerging technologies, frameworks, etc. I used to be an active community member willing to contribute when the opportunity arises but, due to time matter, I cannot do it anymore.

I always try to learn something new anytime I have the opportunity. It doesn't matter if it's technical, product management, etc.: *knowledge does not take place*

Interests

I spend a lot of time working with it, and I have the blessing of working on my hobby: software ideation, design, and development. My current technical interests are on:

- AI transformation – working with MCPs, models, agent orchestration
- Clean code, clean architecture, DDD, and more.
- Front end UI/UX design and development
 - React
- Backend development
 - Node
 - Python
- Cloud Services and Infrastructures
- DevOps
- Team management
- Mentoring

Outside of working hours

I was a Meteor evangelist and, also, one of the organizers of the Meteor Spain Meetup community. I've also gave some talks about Meteor.

- February 19th, 2014. First Meteor Spain Meetup at the URJC in Fuenlabrada
- October 4th, 2014. Rapid prototyping with Meteor at WeNode Barcelona

I've been member of local Meetup groups:

- Madrid JS,
- IoT Madrid
- HTML5 Spain
- ...

Education

1 2025 LLM fine tuning

PROVIDER: EPAM

1 2024 GenAI Solutions, Development bootcamp

PROVIDER: EPAM

1 2024 Resource Manager basics

PROVIDER: EPAM

1 2023 AWS Workshop, Serverless patterns

PROVIDER: EPAM

1 2017 AWS Certified Solutions Developer, Associate 2017

PROVIDER: Udemy

1 2017 Angular 4, The complete guide

PROVIDER: Udemy

1 2017 Vue.js 2, The complete guide

SCHOOL NAME: Coritel

1 2002 Distributed Java Programing (May 2002)

SCHOOL NAME: Sun Microsystems, Madrid

1 1998 to 2000 VT in Application Development

SCHOOL NAME: IES Jovellanos, Fuenlabrada (Madrid)

Work Experience

Optiva Media/EPAM - November 2022

I'm working as software architect, backend and frontend developer, ai researcher. I'm also helping project manager on the daily tasks plus meetings with the clients. Coordinate the PoCs community and working as Resource Manger to provide guidance to the new commers to our company.

MCP Gateway / Claude customization

Software Architect designing and developing a cloud-native platform for a global sportswear retailer, focused on Model Context Protocol (MCP) integrations. Responsible for solution architecture, full-stack development, cloud infrastructure, and containerized services using AWS, TypeScript, Python, and Docker.

- ✓ AWS
 - Lambda
 - S3
 - Cloudfront
 - DynamoDB
 - AgentCore
- ✓ AWS CDK
- ✓ Python
- ✓ TypeScript
- ✓ MCP protocol
- ✓ Claude Code
- ✓ SDD

AI-Based PoCs and Internal Product Development

AI Innovation & Internal Product Development: As part of a strategic initiative to transition the organization toward an AI-centered operating model, I led the design and implementation of AI-driven Proofs of Concept and internal products with commercial potential. My work focused on validating high-impact use cases through LLM-based solutions, RAG systems, intelligent automation, and agent-based architectures. Acting as Tech Lead and AI standards owner for a team of up to 10 engineers, I combined strategic direction with deep hands-on implementation, defining reusable AI patterns, architectural guidelines, and scalable deployment models. Solutions were built using modular REST-based architectures and stateless microservices, ensuring production readiness and alignment with long-term productization goals.

- ✓ Python
- ✓ TypeScript
- ✓ FastAPI
- ✓ NestJS
- ✓ Next.js
- ✓ Azure OpenAI
- ✓ Elasticsearch
- ✓ Milvus
- ✓ Qdrant
- ✓ Langflow
- ✓ n8n
- ✓ Langfuse
- ✓ PostgreSQL
- ✓ SQLite
- ✓ Docker
- ✓ AWS
- ✓ Vercel
- ✓ Supabase
- ✓ GitHub Actions

Retailer Shop Automation: For a leading Spanish retailer, I led the design, adaptation, and development of a modular monolithic platform focused on the centralized integration and management of warehouse automation systems. The solution leveraged an event-driven architecture built on top of an existing legacy codebase, ensuring reliable device communication, real-time operational monitoring, and scalable hybrid cloud deployment. I acted as Tech Lead, Software Architect, and Senior

Engineer, coordinating a team of four while remaining fully hands-on in development, defining testing strategy, and supervising production rollout and stabilization across two major retail locations and one demo/validation site.

- ✓ Java 18
- ✓ Spring Boot
- ✓ REST
- ✓ Kafka
- ✓ PostgreSQL
- ✓ Junit
- ✓ GitHub Actions
- ✓ Hybrid Cloud

Claims microservice: For a funeral insurance company I was in charge of the design, integration and development of microservices within the platform ecosystem. Part of my work consisted of gathering requirements, acquiring functional knowledge, interviewing candidates and managing the development team.

- ✓ Java 18
- ✓ Springboot
- ✓ AWS

Api gateway: I was part of the team responsible for migrating a global-scale solution to provide API services to various frontends for a retail customer. Our primary focus was on performance and segmentation, and we utilized caching through HTTP headers and the CDN.

- ✓ Node.js / Typescript
 - NestJS
 - Customer's SSR framework
- ✓ Jenkins
- ✓ AWS

Image scaler: For a Mexican media company, we developed an image scaling solution designed to deliver appropriately scaled images tailored to the varying resolutions and user interfaces of different devices. The system was deployed on-premises and was engineered to handle peak loads of up to 400,000 requests within brief timeframes.

- ✓ Node.js / Typescript
 - Artillery for load testing
- ✓ Redis
- ✓ Nginx
- ✓ F5

OnePlatform: For a customer in the retail market, we have developed a RAG system to facilitate the onboarding of new hires into the client's ecosystem. The project systematically collects knowledge from various Confluence pages, producing a curated set of documents used as the foundation for the RAG Q&A platform.

- ✓ Node.js / Typescript / Python
- ✓ AWS
 - Lambda
 - S3
 - Cloudfront
 - DocumentDB
 - DynamoDB
 - SageMaker
- ✓ AWS CDK
- ✓ Victoria metrics

Face Diffuser: Automated face detection and blurring is achieved through the use of LLM models, which effectively blur the faces of individuals in the photos uploaded to the system users. Images were processed in batches.

- ✓ Python

- ✓ Docker
- ✓ IaC using Terraform CDK
- ✓ Azure

FUT Automation: AI based project focused on processing survey files produced by friendly users using beta and pre-release versions of the different applications belonging to the media ecosystem like mobile apps and tv apps.

- ✓ Node.js / Typescript / Python
- ✓ React
- ✓ AWS
 - Lambda
 - DynamoDB
 - Cloudfront
 - S3
 - Fargate
 - Amplify
 - SageMaker
 - Codebuild
- ✓ AWS CDK
- ✓ Docker
- ✓ OpenAI hosted in Azure
- ✓ Hugging face models

Work Experience

Valasis / Savi - March 2022 to November 2022

I'm working as a senior software engineer. As a newcomer, my main responsibilities are related to the frontend of the application (refactor legacy functionalities, redesign screens, and user experience), increasing the test base, and providing feedback to product managers on how to improve the product.

- ✓ Node.js
- ✓ AWS
 - S3
 - Cloudfront
 - Cloudwatch
 - EC2
 - ALB
 - RDS

Beeva / BBVA Next Technologies - December 2015 to March 2022

Themis - Frontend Software Architect

As a software architect, I was responsible for designing the platform frontend architecture and UI plus some work on the backend implementation of the Node based API

- ✓ Use of AWS (EC2, S3, DynamoDB, Redshift, Lambda)
- ✓ React / Meteor
 - ES6, HTML5
 - Cucumber
- ✓ Mongo

Clever - Software Architect

As a software architect, I was responsible for designing the platform backend API and part of the messaging system plus some UI/UX designs

- ✓ Use of AWS (EC2, ECS, S3, DynamoDB, Lambda, Cognito)
- ✓ Docker
- ✓ React / Meteor
 - ES6, HTML5
- ✓ Mongo / Arango

AIT Studio - Frontend Software Architect

I was responsible for the UI R&D

- ✓ Polymer
- ✓ Node.js

OpenWeb - Frontend Software Architect (CURRENT PROJECT since 2016)

As a software architect, I was responsible for designing the platform refactor to a service-based architecture using AWS (using Lambdas, S3, CloudFront, etc.) and migrating the code base to Typescript.

- ✓ Node.js / Angular / React / Typescript / Shell script /
- ✓ UI Design / HTML / CSS
- ✓ Mongo / Postgre / Maria DB
- ✓ Intensive use of AWS (EC2, S3, Lambda, Cloudfront, AppSync, X-Ray, Fargate, ALB, ELB, Route 53, Pinpoint, WAF, ECS, Systems Manager)

Atos (former Atos Origin) June 2010 to December 2015

Software Architect / Develop / Technical Advisor at ARI (Atos Research & Innovation).

- ✓ OSX / Linux / Windows
- ✓ **Javascript**
- ✓ Java, Liferay, Drools
- ✓ Drupal, Joomla
- ✓ Android development
- ✓ Technical advisor
- ✓ Involved in
 - **uService** (<http://www.uservice-itea2.eu/>)
 - **BIVEE** (<http://www.bivee.eu/>)
 - **iCORE** (<http://www.iot-icore.eu/>)
 - **Fispace** (<http://www.fispace.eu/>)
 - **FITMAN**(<http://www.fitman-fi.eu/>)
 - and supporting many other projects based on ARI's Project Portal 2 (Drupal 6) and PGI2(Drupal 6/7).

Corporate Analyst. Project name: BBVA SLA. Location: Madrid

- ✓ Windows / Unix
- ✓ Java, Visual Basic, Shell script, Clear case, SQL, Sybase, SQL Server
- ✓ Knowledge acquisition from previous service provider and 2nd level support

Glokal Consulting March 2010 to June, 2010

Corporate Analyst at DIA%. Project name: N2A. Location: Madrid

- ✓ Linux, Shell script, Python, Ant, Java, Spring, Maven, SQL, MySQL, Subversion
- ✓ Analysis, Development, Bug fixing and I+D for the new POS software
- ✓ System performance boost
- ✓ TRAC + SVN tool creation

Same November 2009 to March 2010

Corporate Analyst at Hewlett Packard. Project name: MMT Turkey. Location: Madrid

- ✓ Linux/Windows/Unix, Java, AntLR, XML, XSL, Shell script, SQL, Oracle 10g, Berkeley DB, Subversion
- ✓ Proprietary migration tool modules design and development
- ✓ I+D on Object DB performance

Wairbut September 2009 to November 2009

Corporate Analyst at Tragsega. Project name: Department of Justice. Location: Madrid

- ✓ Windows / Linux
- ✓ Java, SOA (Axis), BPM, Glassfish v2, OpenESB, Mule, XML, XSL, SQL, Oracle 10g, Subversion
- ✓ System requirements analysis for the exchange platform.
- ✓ Web service design and implementation

Shouthern star January 2009 to April 2009

Corporate Analyst at Hewlett Packard. Project name: MMT Carrefour. Location: Madrid

- ✓ Linux/Windows/Unix, Java, AntLR, XML, XSL, Shell script, SQL, Oracle 10g, Berkeley DB, Subversion
- ✓ Proprietary migration tool modules design and development
- ✓ Core modules implementation.

**Atos Origin****March 2005 to January 2009****Corporate Analyst. Project name: LUISA. Location: Madrid / EU** June 2008 to January 2009

- ✓ Windows/ Linux, Java, SOA, Oracle, MySQL, Tomact 6.5, Subversion
- ✓ Joomla administration
- ✓ Web services module integration
- ✓ European Commission FP6 project based on Semantics
- ✓ <http://luisa.atosorigin.es/www/>

Corporate Analyst. Project name: TAO. Location: Madrid / EU

June 2008 to January 2009

- ✓ Windows/ Linux, Java, SOA, JS, HTML, RIA (ZK), UML, MySQL, Tomact 6.5, Subversion
- ✓ Integration manager (Since this was a multi partner project, there was a need of such a role in order to manage the effectiveness of the efforts). Local technical manager.
- ✓ Web services modules integration
- ✓ Eclipse plugin development
- ✓ European Commission FP6 project based on Semantics
- ✓ <http://www.tao-project.eu/>

Technical Analyst & Developer. Project name: GAP/STORM. Location: Madrid

March 2005 to June 2008

- ✓ Windows / Linux
- ✓ Java, AWT, Swing, HTML, JS, XML, XSL, Struts 1.x, Hibernate, Spring, Oracle 9i, Tomcat 6.12, JBoss, CVS
- ✓ Several roles played during the two projects (Analyst, Developer, Team Manager)

**Coritel****July 2003 to December 2004****Technical Analyst & Developer. Project name: Carrefour SLA.****Location: Madrid**

November 2004 to December 2004

- ✓ Windows/ Unix, Java, HTML, JS, Struts 1.x, Oracle, Websphere, CVS
- ✓ Version and deploy management
- ✓ Bug fixing

Technical Programmer Analyst at Vodafone CAP/PRECOS (Madrid)**June 2004 to September 2004**

- ✓ Windows/Unix, C, C++, Oracle, Source Safe
- ✓ Knowledge acquisition manager
- ✓ Commissions engine designer for the new software replacing the old tool

Technical Programmer Analyst at GWE (Malaga, Milan, Dusseldorf)**July 2003 to April 2004**

- ✓ Windows/Unix, Java, JS, XML, XSL, Castor, Oracle 8i, Websphere 5.1/6.1, Source Safe
- ✓ Content Display Application manager.
- ✓ Migration, change and troubleshooting manager.
- ✓ Multilingual project (main language: English)

Technical Programmer Analyst at ViaDigital LOPD (Madrid)**March 2003 to July 2003**

- ✓ Windows/Unix, Java, JS, EJB, XML, XSL, LDAP, Sybase, Oracle, Weblogic, Source Safe
- ✓ Security and cipher manager
- ✓ Web GUI development
- ✓ Cipher engine development

**Coritel****July 2000 to September 2002****Senior Developer at Barclays Net (Madrid)****April 2002 to September 2002**

- ✓ Windows, Java, HTML, JS, XML, XSL, Oracle, Websphere, Source safe, Websphere Component Composer

- ✓ Web GUI development
- ✓ Middleware process development

Senior Developer at BSN Banif Content Subscription (Madrid) September 2001 to April 2002

- ✓ Windows, Java, EJB, HTML, JS, XML, XSL, Oracle, Websphere, Source safe
- ✓ Web GUI development
- ✓ Batch processes manager (content generation and delivery)

Junior Developer at Iberion/Tefiberion (Madrid) September 2000 to September 2001

- ✓ Windows, Java, Jsp, HTML, JS, XML, XSL, Oracle, Websphere, Source safe
- ✓ Web GUI design and development

Letter of Recommendation

Carlos Cañado Moya
Head of Innovation & Software Development

22 de marzo de 2013

There is not environment, language or technology that Francisco does not know, and if there is something that he doesn't know, his voracious curiosity will turn him into an expert in a short period of time. I have worked with many professionals, but none of the extreme value of Francisco Calle. He will always be for me, someone who can bring knowledge in any field.

Massimo Canducci (2015)
Innovation Director at Engineering Ingegneria Informatica Spa

Francisco is a very focused and smart web architect. We worked together in a research project and he have done a great work, not only from the technical point o view, but also from the business and perspective one.

Jorge Pereira Carlos (2014)
Project manager at Atos Research and Innovation

Francisco Calle (Paco) has a beautiful analytical mind, matched with a boundless enthusiasm for his work. It was both a pleasure and a blessing to count on his collaboration for facing several tricky development challenges in our innovation and research projects. Having a solid grasp of the art of internet software development, Paco is keenly attuned to potential problems and proactive about fixing them in advance. When the unexpected strikes, he's a first line responder who won't give up until the problem is solved. Paco's demeanor was always pleasant and welcoming when approached by everybody in the office. I would work with him again without hesitation.

Julio Pastur
Project Manager at Hewlett Packard

Francisco Calle has a high professional level within the areas he manages. High level of commitment to the projects that participated, even beyond his assigned tasks. Good relations with other colleagues

Fernando Bardal Otero
Technical Manager at Hewlett Packard

Francisco is a thorough professional who far exceeds the expectations may have it in every way, both technically and personally. It is well self-sufficient, rapidly integrating into a new development team with new technologies for him at that time is productive quickly, is fast developing and the quality of his development is good, is very proactive and commitment and involvement is excellent, he is quickly integrated with the rest of the team members and collaborates well with them. It was a pleasure working with him and a shame (and inconvenient) having to do without his services on the team.

Vicente Povedano
Energy Distribution Systems Manager at Atos Origin

Francisco has worked on development teams with great determination and commitment. He has been instrumental for the group as he stands as a natural leader given his expertise and his ability to investigate and to always provide innovative solutions when necessary. He is a hard worker and self-taught, always keeping up to date and share knowledge with their peers.

In short, a person who has been very good work and thanks to his work has been possible to achieve success in projects that have worked.
